--- What To Expect

Our tour is the only place in Hiroshima to enjoy a relaxing E-MTB journey up to Mt. Omine! It's pretty rare to be able to try out riding an electric mountain bike, and with the beautiful sights to see up the forest trail, this tour is certainly something you don't want to miss out on. The ease-of-use electric assist function on our mountain bikes also makes the trek a breeze, so beginners can rest assured that their experience will be a blast. The tour here follows a special route allowed for use by the mountain owner, and once you reach the top, there lies Hiroshima City's tallest peak – Mt. Omine. Just around 10 minutes of climbing, you'll find yourself before a stellar view overlooking the entire Seto inland sea! It's an entire 360° shot of all the mountain and ocean beauty that Hiroshima has to offer. If the weather is clear, you can see as far as the mountains of Shikoku, and sometimes you can even catch sight of Kyushu. The tour offers a lunch break after reaching the top, followed by whipping up some delicious coffee right on the spot. The taste of a hot cup of coffee after a climb is really something to savor! And hopefully the tour will be the perfect opportunity for everyone to learn a little about the world around us, from the mountains, to the rivers, ocean, and sky. There's plenty of discoveries to make out here in nature! After getting back to base camp, it's to the onsen! Right next to the Yuki Experience Center, there's conveniently an onsen facility to bath and chill out at. Feel free to stay a while to wash off the sweat and take a load off your shoulders before heading home.
